Subject index

Ab initio calculations 437, 525
Acyclic polynomial, coefficients of 107
Allyl anion 101
Analytical derivatives 447
Aniline 235
Application of ϑ_3 functions 135
Aromaticity 23
Atomic wavefunctions 51

Basis set superposition error 11
Benzene character 23
Benzenoid hydrocarbon 23
Benzenoid π-network polymers 409
Bifurcations 281
Bifurcation transition region 309
Binding energy 259
2,2'-Bipyrrole 41
Biradicals 107
Bis(ethylene)nickel 119
Bonded complexes 491
Bond localization 369, 409

Canonical structures 107
Carbon monoxide 525
Characteristic polynomials 35
Chemical graphs 35
Chemical reactions 281
Close coupling 175
Coherence effects 323
Complex ion 225
Complex substituents 247
Continuum model 505
Convergence properties 181
Correlation effects on bonding 119
Counterpoise corrections 11
Coupled perturbed methods 447
Crystal field 225

Dewar-Chatt-Duncanson model 119
Dewar structures 107
Diatomic molecules 259
Dimer covering enumeration 409
Dipole sums 461
Double cosets 447
Doubly-charged cations 147
Dynamic behavior 309
Dynamic structure factor 475

Edge reactivity 409
Electric moments 161
Electron density 63, 71
Electron transfer 89
Energy spectrum of ~ 247
Ethylene orientation 119

1-Factor enumeration 409
Fock's expansion 181
Free internal rotation in molecular complexes 135
Functional analysis 181

Gaussian 80, 63
Gaussian models 71, 425
Gradients 357
Graph theory 1, 107, 409
Group theory 1

H_3 171
Heisenberg model 393
Helium atom eigenfunctions 181
Hydrogen 491

Integral processing 447
Interaction energy decomposition 11
Intermolecular interactions 461
Intramolecular dynamics 323
Isomerization processes 1

Kekulé structure enumeration 409
Kekulé structures 107

Ligand permutation 1
Ligand polarization 225
Lithium atom 51
Lithium hydride 161
Localized orbitals 357
Long-range order 369, 409

Medium influence in the electronic matrix element 89
Metalloproteins 89
MO calculations 41, 235
Molecular dynamics 475
Molecular electrostatic potential 425
Møller-Plesset theory 357

MP2 357
MP2 gradients 357
Multiphoton excitation 323

Neél states 393
π-Network polymers 369
π-Networks 393
Nitrogen inversion 235
Non-planarity of ring 235

Pair correlation 357
Pair-diffusion 475
Pentacoordinate complexes 1
Perturbation theory 357, 437
Pipeline vector computer 175
Point charge models 63, 71, 425
Polarizabilities 161, 337
Potential energy surfaces 265, 281

Radical-cations 107
Reaction field theory 505
Reaction paths 265, 281
Refractive index 461
Relativistic effects 437
Resonance theory 369, 393
Rigorous and approximative partition functions of free internal rotation 135
Rotational barrier 41, 101
Rydberg states 51

Sachs graphs 107
Scattering 175
Second-order Jahn-Teller effect 171
Solitonic excitations 369
Solvation and desolvation effects 505
Spin waves 393
Stabilities and reactivities 147
Structure count 107
Structure optimization 437
Substituted polymethines 247
Symmetric function theory 35
Symmetry 447

TCSF-IR intensities 337
Thermodynamics thereof 135
Transfer matrices 369, 409
Trajectory analysis 309
Transition probabilities 525
Transition states 281

Valence-bond model 369, 393
van der Waals and hydrogen-bonded dimers 135
van Hove function 475
Vibration-to-vibration collisional energy transfer 175
Vibronic intensities 225
Vineyard approximation 475

Water molecule 71, 425
Weizsäcker correction 259

X-ray emission 525

Contents volume 69

No. 1 1— 88 issued on January 30, 1986
No. 2 89—180 issued on March 28, 1986
No. 3 181—264 issued on April 25, 1986
No. 4 265—356 issued on May 30, 1986
No. 5-6 357—534 issued on June 16, 1986

Acevedo R, Flint CD: The calculation of electric dipole vibronic intensities in centrosymmetric coordination compounds using the crystal field-closure-ligand polarization model 225
Alexander SA, → Klein DJ, et al. 393
Almlof J, Faegri K Jr: Relativistic effects on molecular structure: methyl derivatives of the fourth main-group elements 437
Amos AT, → Yoffe JA, et al. 461
Amos RD, → Somasundram K, et al 491

Barakat R: Characteristic polynomials of chemical graphs via symmetric function theory 35
Binkley JS, → Yamaguchi Y, et al. 337
Bishop DM, → Maroulis G 161
Bock CW, George P, Trachtman M: A molecular orbital study of nitrogen inversion in aniline with extensive geometry optimization 235
Borden WT: When is H_3 stable to asymmetric distortion? 171
Brandemark UB, → Siegbahn PEM 119

Cammi R, Tomasi J: Counterpoise corrections to the evaluation of the bimolecular interaction energy components. On the decoupling of the E_{MIX} term 11
Chattaraj PK, → Deb BM 259
Chen Zhixing, Huang Siqun: On some problems in the theorems of alternant hydrocarbons *(Corrigendum)* 83
Constanciel R: Theoretical basis of the empirical reaction field approximations through continuum model 505

Deb BM, Chattaraj PK: Comments on the correlation between the Weizsäcker correction and the binding energy of diatomic molecules 259
DePristo AE, → Kraus WA 309
Dias JR: Properties and derivation of the fourth and sixth coefficients of the characteristic polynomial of molecular graphs — New graphical invariants *(Corrigendum)* 84
Dietz F, → Tyutyulkov, N, et al. 247

Fabian J, → Tyutyulkov N, et al. 247
Faegri K Jr, → Almlof J 437
Flint CD, → Acevedo R 225
Frisch MJ, → Yamaguchi Y, et al. 337

Gama AAS da, → Onuchic JN 89
George P, → Bock CW, et al. 235
González-Luque R, Nebot-Gil I, Merchán M, Tomás F: An *ab initio* CI study on the rotational barrier of the allyl anion 101

Hall GG, → Smith CM 63
Hall GG, Smith CM: The electron density of the water molecule 71
Hall GG, Tsujinaga K: The molecular electrostatic potential of some simple molecules 425
Handy NC, → Somasundram K, et al. 491
Hite GE, Metropoulos A, Klein DJ, Schmalz TG, Seitz WA: Extended π-networks with multiple spin-pairing phases: resonance-theory calculations on poly-polyphenanthrenes 369
Hite GE, → Klein DJ, et al. 393
Hite GE, → Klein DJ, et al. 409
Hoffmann DK, Nord RS, Ruedenberg K: Gradient extremals 265
Hoheisel C, → Vogelsang R 475

Huang Siqun, → Chen Zhixing 83
Jortner J, → Schek I 323

King RB, Rouvray DH: Chemical applications of topology and group theory. 19. The even permutations of the ligands in five-coordinate complexes viewed as proper rotations of the regular icosahedron [1] 1
Kitaura K, → Sakurai K, et al. 23
Klein DJ, → Hite GE, et al. 369
Klein DJ, Alexander SA, Seitz WA, Schmalz TG, Hite GE: Wavefunction comparisons for the valence-bond model for conjugated π-networks 393
Klein DJ, Hite GE, Seitz WA, Schmalz TG: Dimer coverings and Kekulé structures on honeycomb lattice strips 409
Kraus WA, DePristo AE: Reaction dynamics on bifurcating potential energy surfaces 309
Křivka P, → Ruščić B, et al. 107
Kundu B, Mukherjee PK: Calculation of rydberg states of lithium isoelectronic sequence 51

Larkins FP, → Rowlands TW 525
Lee TJ, → Yamaguchi Y, et al. 337

Maggiora GM, → Yoffe JA, et al. 461
Maroulis G, Bishop DM: Electric moments and polarizabilities for LiH ($X^1\Sigma^+$) 161
Mehlhorn A, → Tyutyulkov N, et al. 247
Merchán M, → González-Luque R, et al. 101
Metropoulos A, → Hite GE, et al. 369
Moran TF, → Shields GC 147
Morgan III JD: Convergence properties of Fock's expansion for S-state eigenfunctions of the helium atom 181
Mukherjee PK, → Kundu B 51

Nebot-Gil I, → González-Luque R, et al. 101
Nishimoto K, → Sakurai K, et al. 23
Nord RS, → Hoffmann DK, et al. 265

Onuchic JN, Gama AAS da: Influence of intersite modes on the exchange interaction in electron transfer at large distances 89
Orti E, Sánchez-Marin J, Tomás F: Conformational behaviour of 2,2'-bipyrrole. An *ab initio* approach 41

Polansky OE, → Tyutyulkov N, et al. 247
Pulay P, Saebø S: Orbital-invariant formualtion and second-order gradient evaluation in Møller-Plesset perturbation theory 357

Rouvray DH, → King RB 1
Rowlands TW, Larkins FP: Factors influencing the calculation of molecular X-ray emission spectra 525
Ruedenberg K, → Hoffman DK, et al. 265
Ruedenberg K, → Valtazanos P 281
Ruščić B, Trinajstić N, Křivka P: On the generalized approach to the structure count 107

Saebø S, → Pulay P 357
Sakurai K, Kitaura K, Nishimoto K: Partial structure analysis of conjugated systems. I. Benzene character 23
Sánchez-Marin J, → Orti E, et al. 41
Schaefer III HF, → Yamaguchi Y, et al. 337
Schek I, Jortner J: Restoration of coherence effects in high-power excitation of an intramolecular quasicontinuum 323
Schmalz TG, → Hite GE, et al. 369
Schmalz TG, → Klein DJ, et al. 393
Schmalz TG, → Klein DJ, et al. 409
Schwenke DW, Truhlar DG: Converged close coupling calculations for V—V energy transfer: $2HF(v = 1) \rightarrow HF\ (v = 2) + HF(v = 0)$ 175
Seitz WA, → Hite GE, et al. 369
Seitz WA, → Klein DJ, et al. 393
Seitz WA, → Klein DJ, et al. 409
Shields GC, Moran TF: Doubly-charged gas phase cations 147
Siegbahn PEM, Brandemark UB: Orientational preference of two ethylene ligands bound to a nickel atom 119
Slanina Z: Internal rotation in molecular complexes: some problems concerning the evaluation of equilibrium and rate constants 135
Smith CM, Hall GG: The approximation of electron densities 63
Smith CM, → Hall GG 71
Somasundram K, Amos RD, Handy NC: *Ab initio* calculation for properties of hydrogen bonded complexes $H_3N\cdots HCN$, $HCN\cdots HCN$, $HCN\cdots HF$, $H_2O\cdots HF$ 491

Taylor PR: Symmetry-adapted integral derivatives 447
Tomás F, → Orti E, et al. 41
Tomás F, → González-Luque R, et al. 101
Tomasi J, → Cammi R 11
Trachtman M, → Bock CW, et al. 235
Trinajstić N, → Ruščić B, et al. 107
Truhlar DG, → Schwenke DW 175
Tsujinaga K, → Hall GG 425
Tyutyulkov N, Polansky OE, Dietz F, Fabian J, Mehlhorn A: Studies of the energy spectrum of ω,ω'-substituted polymethine chains. III. Many-atom substituents 247

Valtazanos P, Ruedenberg K: Bifurcations and transition states 281
Vogelsang R, Hoheisel C: A Vineyard-type approximation for the distinct term of the dynamic pair correlation function 475

Yamaguchi Y, Frisch MJ, Lee TJ, Schaefer III HF, Binkley JS: Analytic evaluation of infrared intensities and polarizabilities by two-configuration self-consistent field wave functions 337
Yoffe JA, Maggiora GM, Amos AT: Dipole sums and intermolecular interaction coefficients derived from refractive index data 461

Book review

Müller-Herold U, → Primas H 353
Primas H, Müller-Herold U: Elementare Quantenchemie 353
